

solutions for the office

## 3ND executive

Executive, i.e. the professional version of the 3ND collection, where geometry and the wise combination of different materials contribute to the birth of an office that goes beyond time and fashions. 3ND/TREND: because the essentiality of shapes designs an ever lasting elegance.

The “leit motive” of the collection is the geometry that, along with the combination of proposed materials, steel and veneer or steel and glass, confer prestige and sobriety to the 3ND.EXEcutive office.

## 3ND operative

3ND/TREND, i.e. a new tendency for Giaiotti that, by a return to a natural simplicity, both as far as shapes and compositions of working spaces are concerned, has created a modern, functional and technological office, this way renouncing to too complicated and elaborated solutions. 3ND.Operative is the expression of a method now renewing in a product philosophy already shown in the past with other successful lines.

The new 3ND design is distinguished by an innovative concept of space and practicalness, with sober yet modern lines: a collection of essential and naturally elegant elements. 3ND.Operative proposes the combination between steel and laminate.

# focus

FOCUS, the Latin word meaning “fire”. However, in today's language the verb “to focus” is used with the meaning of concentrating one's attention on something. This range focuses on a message of singularity and exclusivity, identifying unequivocally those who choose it. Comfort and image, care for details and highly selected materials make FOCUS a modern yet timeless proposal for the furnishing of professional offices.

The design of the top profiles match elegantly.

## ergostep evolution

ERGOSTEP is a new office furniture line thought to satisfy the most different needs for the rationalization of the office environment. ERGOSTEP is characterized by innovative ergonomic solutions. The shapes of working tops and the height-adjustable structures allow for multiple combinations, suitable for different kind of use.

The frosted glass table top confers refinement and “minimalist” elegance to the managerial working surface. The mobile unit allows an easy shift of all PC components (CPU + monitor + keyboard) which remain, therefore, autonomous from the actual operative top.

## ergostep evolution

Multiple workstations, neighbouring but independent, can be realized with the use of suspended partition equippable panels in between. Each operator can make use of a "caddy", a personal container, for safely lock his own daily working tools and personal belongings.

## \_ergostep\_reception

Reception area realized with combined curved elements.

## ergostep Q + contenitori M

Conventional "L" shaped desks complete with connectable typist desks. Open front metal cabinets and stackable flipper door cabinets, complete with locks. The program is designed in order to raise cabinets from the floor by means of either feet or castors. All cabinets may be supplied with metal shelves suitable also for suspended files.

## ergostep Q

Bench working stations. Capable central cable housing, with “top access” from both sides, conceived for an easy access to sockets and wires outlet. Additional lateral separations can be realized by utilizing simple panels in translucent plastic material, that can be placed in any position. Intermediate sets of legs are “shorter” than the total depth of work tops this allowing utilization of the entire length of bench.

Central perspex panels, suitable also for suspending flat monitors.

## web

WEB is a system comprising a wide range of elements and accessories essential to enhance the operative and aesthetic functionality of an office. Its ergonomic shapes allow maximum liveability of the environment. The leg uprights, both fixed height or height-adjustable, made of circular metal profile, combined with a press-shaped foot, painted in different colours, confer stability and elegance to the workstation, in combination with the under top cable housing bar.

The wide range of top shapes and sizes, in melamine, along with relevant corner elements and service units, in combination with desk-height and carrying pedestals allow obtaining single and multiple working places, with high ergonomic level.

## screen games

The organisation of modern working environments must satisfy people's needs not only in the basic's of comfort and function but perhaps equally important contentment. The creation of individual and personalised physical space within a defined area without losing the facility to communicate easily with colleagues improves mental attitude which in turn increases productivity.

SCREEN GAMES offers excellent design and quality with total flexibility.

## wall games

An office partition program designed according to advanced ergonomic criteria, utilizing particularly suitable materials, also as far as security is concerned. With Wall Games, offices assume a new dimension, of better living, allowing people to personalize their own space, thanks to the many interesting accessories. This is obtained without sacrificing the global image and maintaining a high level of functionality.

Giaiotti's partition program represents therefore the wall evolution and becomes a reference point in architecture of office environments.
